# **Type J Sure-Flex Plus® BTS**

# **Selection For Close Coupled Applications**

#### **FLANGES**

Type J flanges sizes 3, 4 and 5 are manufactured of sintered carbon steel. The powdered metal manufacturing process provides high dimensional accuracy and uniform material properties for high strength. Size 6 is made of high strength cast iron.

Flanges are bored-to-size for a slip fit on standard shafts. The outside face of the flange is precision machined, allowing the surface to be used to align the coupling without special tools.

Type J flanges can be used with EPDM and Neoprene sleeves. Each flange has a standard keyway, one setscrew over the keyway and one setscrew at 90° from the keyway.

### **COUPLINGS**

Spacing between internal flange hubs equals G. Spacing between shafts should be greater than 1/8 in. and less than L minus .85 times the sum of the two bore diameters.

To order couplings, refer to the part number examples on page F1-3. When specifying Type J flanges, the coupling and bore sizes accompany the flange symbol "J". For example, 3J x 1/2 is 3J12.

## **DIMENSIONS (in.)**

| Size | Dimensions |       |       |       |       |         |       |        | Wt.<br>(lbs.) | STOCK BORES* |     |     |     |     |       |   |       |        |       |       |             |   |    |    |    |    |    |    |    |    |    |
